

DEFINITION

Products that have limited availability and will be managed as a one-time quantity commitment with no replenishment.

- Products that have limited availability:
 - Licensed Producers (“LP”) can only produce a finite amount of finished goods
 - To support a Licensed Producer’s go-to-market strategy
 - May be used to support big events as per the schedule on Doing Business with OCS website
- Multiple purchase orders (“PO”) may be issued against the one-time quantity commitment
- Items are to be submitted through the Product Call process and cannot transition to a General Listing SKU without being resubmitted to a future Product Call
- A SKU will go through the same evaluation and scoring process as all listing types
- This is a great option for small grows, unique launches, or as a go-to-market strategy
- Unsold inventory will follow an identical process as General Listing SKUs and are subject to the same conditions for returns
